**Situational**

Correct

The STAR method is a technique used to answer behavioral and situational interview questions.

**Behavioral**

Correct

The STAR method is a technique used to answer behavioral and situational interview questions.

Mathematical

#### Question 2

Which of the following practices can help you answer interview questions clearly and effectively? 1 / 1 point

Attempt to finish the interviewer's question before it is asked to show initiative and technical understanding.

**Listen carefully and consider each question before responding.**

Refer to your knowledge of the NIST Cybersecurity framework after responding to each question.

Include a question for the interviewer in your response.

Correct

Carefully listening and considering each question before responding during an interview allows you to fully understand what is being asked of you. This allows you to answer each question clearly and effectively.

#### Question 3

A hiring manager interviews you for a cybersecurity analyst role. They ask you to tell them about a time you were tasked with handling a difficult challenge. What strategy could you use to provide a thoughtful and thorough response? 1 / 1 point

A conditional statement

**The STAR method**

An elevator pitch

The situation STAND method
